Fiber To The Home (FTTX)

Fiber to the home (FTTX) is the delivery of a high speed optical fiber from the TV program broadcaster or telecommunications service operator's switching equipment all the way to a home or business. This trend of replacing existing copper infrastructure such as telephone wires and coaxial cable is relatively new and fast growing and its higher bandwidth enable bandwidth intensive applications such as VOD, internet gaming. Connecting homes directly to fiber optic cables offers a number of benefits.
